### 3. Development of In-Vitro Assays to Assess the Potency of Botulinum Neurotoxin Type A

Release Date: 04-29-2009Open Date: 07-05-2009Due Date: 05-08-2012Close Date: 05-08-2012

Clostridium botulinum is an anaerobic bacterium that produces a neurotoxin thought to be the most lethal substance known (on a per molecule or per weight basis). Strains of C. botulinum have been identified that produce 7 different types of this neurotoxin, designated as types A through G. The toxin is synthesized as a single polypeptide of approximately 150 kD. Selective proteolysis is important ...

**5. Tools to Mitigate and Understand the Mental Health Effects of National Disasters**

Release Date: 03-03-2009Open Date: 03-05-2009Due Date: 01-08-2012Close Date: 01-08-2012

Background The physical impact of Hurricane Katrina occurred over hours and days. The mental health effects of this large-scale, traumatic event may be fully evident only over weeks, months, years, and, perhaps, generations. The types of trauma from such events are many, diverse, and complex. The affected populations, including both direct victims and those secondarily involved (e.g., first resp ...
